### Woodcock

- Application of new technologies to the study of Eurasian Woodcock migration
- Woodcock breeding population survey in the Kaliningrad Region of Russia
- National roding censuses of migrating Eurasian Woodcock (Scolopax rusticola) populations in Hungary in spring 2009 and 2010
- Monitoring of the Woodcock population in European Russia (1996-2010)
- Analysis of sex and age ratios of the Woodcock population shot in spring 2010 in Hungary
- Effects of summer 2010 drought in European Russia on the migrating and wintering Woodcock population in France
- Survival rates of Eurasian Woodcock (Scolopax rusticola) in North-West Russia based on ring recovery analyses
- Spring abundance of roding Woodcock in Moscow Region
- Woodcock bag limits – A 6-year experience in Brittany
- Aspects of the migration of Russian Woodcock (Scolopax rusticola), based on ringing data
- Spring abundance of roding Woodcock in Moscow Region
- Woodcock breeding in Denmark – Status and recent changes
- Long-term monitoring of the Hungarian Woodcock bag during 1995-2008

### Snipe

- Distribution and trend in numbers of Common Snipe (Gallinago gallinago) in the North of the Moscow Region
- The breeding population of Common Snipe in wetland habitats of the Russian plain
- Current state of the breeding population of Common Snipe in mainland Portugal
- Trophic adaptations of the different species of snipes on the basis of morphology of the feeding apparatus
- Adaptations of the feeding apparatus of snipes
- Common Snipe, Great Snipe and Jack Snipe in the eastern upper Volga area

### Woodcock and Snipe

- Eurasian Woodcock and Common Snipe of the Omsk Oblast
- Advancement of arrival of the Woodcock (Scolopax rusticola) and Common Snipe (Gallinago gallinago) to Estonia, 1923-2009: does weather play a role?
